Alan	Elizabeth	Wilson	7		
Brian	Allison	Morris	7		

Information is taken from tables compiled by the World Association of Veteran Athletes (WAVA).

Age-graded tables provide information that can be used to compare performances at different ages. An age factor, dependent upon the runner's sex and age, is applied to a finishing time. Multiplying greater is the effect.

For example, for the half marathon, equivalent times for different ages are:

30 years - 1h 10m 00s; 40 years - 1h 11m 47s; 50 years - 1h 17m 21s; 60 years - 1h 24m 18s

In the Results Tables the runner's actual position and time are shown in the columns:

POS, HT, WT and S.

The age-graded factor and time are shown in the columns:

Corr, T, Wt and S.

As an example, John Fidler finished in 11th position overall with a time of 1h 11m 11s. As John's age is 49, an age factor of 0.9121 applies. This gives John an age-graded time of 1h 4m 55s, the fastest on the day.
